### HOW TO REPLY TO THIS NOTICE:

#### I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

The Patent Term Adjustment to date is 1973 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 1973 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## **DETAILED ACTION**

### **Response to Amendment**

1. This Office Action is in response to BPAI Decision on: 12/03/2008.

Claims 1-20 are still pending.

### **Reasons for Allowance**

2. Claims 1-20 are allowed.

The following is a statement of reason for the indication of allowance: see BPAI Decision (pages 4-6),

The instant application depicts that an apparatus is provided for a communication station operable in a wireless communication system, at least to receive at least first burst data signals transmitted thereto upon at least a first channel by a first sending station. At least a first demodulator is selectably coupled to receive indications of burst of the first burst data signal. The first demodulator performs demodulation operations upon the indications received thereat. A controller is coupled to the first demodulator. The controller controls performance of the first demodulator to cause cyclo-stationary filtering (CSAF) of successive bursts of the first burst data signal during demodulation of the first burst data signal by the first demodulator.

In addition, the instant application specifically discloses that the cyclo-stationary adaptive filtering (CSAF) is performed upon the uplink data burst signal. CSAF is a signal processing technique to allow adaptive filters to operate in environments that exhibit cyclic/deterministic channel environments. Each burst of the data signal

Art Unit: 2617

transmitted by a subscriber station forms a separate and distinct stationary channel environment. Each of the channels is processed by configuring the receive portion of the base station with a matched filter forming the equalizer, such as equalizers 303 and 305 (shown in FIG. 3) for the specific channel. The values forming the profiles stored at the memory device of the controller are used to weight the equalizer, as appropriate.

The updated search found that:

Ushirokawa (US 5,646,964) discloses that a matched filter (despreading filter) may be provided between the band-limiting filter and the equalizer and a spread code is applied to the matched filter as tap weight coefficients to extract the desired signal, while the interference that remains at the output of the matched filter is eliminated by the equalizer (see specification).

Quigley (US 7,120,123) suggests that A media access controller (MAC) generates media access protocol (MAP) message including idle slots for assigning time slots in which cable modem transmits signal bursts on the upstream channel. A transmitter transmits the MAP messages with the ideal slots downstream to the cable modems. An adaptive notch filter connected to the demodulator which receives signal burst on the upstream channel, suppresses noise on the upstream channel sensed during idle slots (see specification).

Figure 7 of Renard (US 6,480,555) shows a table of results from a computer simulation where FCBs were randomly distributed (using a Gaussian distribution) within a  $\pm 0.50$  kHz window, and detected using a current prior art adaptive filter detector and the new detector of the present invention without consideration of IF bandwidth

Art Unit: 2617

limitations. Data was taken over one-hundred FCBs in each frequency range, each separated by one randomly modulated data burst (see specification).

However, the combination or each of the cited prior arts above does not disclose nor fairly suggest the claimed limitations “controlling performance of the first demodulator to cause cyclo-stationary filtering of successive bursts of the first burst data signal during demodulation of the first burst data signal by said first demodulator”, therefore claims 1-20 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
